

Friends of Chadwick

High School Mainway Skerton

We aspire to help the school to offer a unique choice of
wholesome health and wellbeing interventions

With a firm foundation for supporting students to take good
care of their strengths from where our resilience grows.
Creating the much needed awareness to swiftly and smoothly
overcome challenges and transition in the future.

We work in partnership with the Student Council, local and
national organisations who hold a shared vision for learning
and creating natural ways to take care of all of us
body, heart, mind and will (power)
Holistically.

An interest in volunteering is essential. Previous social responsibility and
charity work not. Good understanding of student life and experience of
building resilience is helpful. Willingness to take a person centred, whole
system approach, towards social prescribing & integrated care is a gift.
